TRACT

This memo concerns the Scientific Branch of ORE. It states that activation of the Branch awaits the arrival of Mr. [REDACTED] 25X1A Chief. At present, the memo continues, the Branch should engage in research itself rather than hire a few highly trained consultants, for budgetary reasons. The Branch plans to recruit men of good standing in the fields of Aeronautics, Atomic Energy, Biological Warfare, Chemical Warfare, Communications and Electronics, and Guided Missiles who will recommend a program of coordination and research and are in each field must be full time. Additional Divisions to meet these recommendations may be established.
